

CPL – simply reliable!

CPL Pharma Lager und Vertrieb GmbH designs and performs tailor-made logistics solutions for the health care and pharmaceutical industry. The company is a subsidiary of the pharmaceutical wholesaler Andrae-Noris Zahn AG (ANZAG). For our clients we simplify complicated logistic processes with tailor-made logistic concepts and are thus able to enhance the quality and efficiency of the supply chain. We supply every logistics service ourselves, so that our clients can entrust us with all their logistics. At the same time, our logistics solutions enhance the customer service provided by our clients. In addition to stock maintenance, customer accounting, warehousing and distribution we also supply hotline services and supplementary services such as random sampling.

CPL's clients thereby profit from our many years of experience in the health care and pharmaceutical logistics industry. As a subsidiary of ANZAG we can use the logistics system of one of the leading pharmaceutical wholesalers in Germany. With our central warehouse in Flieden and its provision for 30,000 pallets, and the 24 regional distribution centres in the ANZAG locations, with our integrated micro logistics system we ensure that our clients' products rapidly and without complication reach every destination where they are required.

Services

Individual modules for individual clients

Our clients can combine CPL service components as they wish, according to their needs, from the transfer of single partial processes, up to a full outsourcing solution.

- **Purchasing.** As a pharmaceutical wholesaler and central warehouse subsidiary of ANZAG, CPL is integrated in the pharmaceutical purchasing market as a market participant.
- **Procurement.** CPL undertakes procurement of the requisite products and ensures the best possible warehouse management for manufacturers and wholesalers.
- **Warehouse operation.** Commensurate with the exacting requirements of health care and pharmaceutical manufacturers, CPL possesses modern warehouse technology which meets the highest demands in inventory management.
- **Special processes in inventory management.** The specific characteristics of the pharmaceutical market require specific solutions for sections of product ranges within inventory management. As a pharmaceutical wholesaler, CPL can supply these, applying standard processes which have been tested in practice.
- **Sales.** As a pharmaceutical wholesaler, CPL maintains its own business relations with a large number of pharmaceutical wholesalers and chemists in Germany, and also with other specialist retailers.

- **Order processing.** CPL undertakes the whole management of orders and customers, from inputting the order to delivery.
- **Special processes in processing orders.** CPL offers its clients individual services in order processing, fulfilling the special conditions of health care and pharmaceutical logistics.
- **Customer service.** CPL can take over full customer service for health care and pharmaceutical manufacturers. The customers receive individual service from CPL on the basis of the manufacturer's stipulations.
- **Payment management.** Upon request CPL can take over all customer accounting including management of accounts receivable and of overdue accounts.
- **Services for manufacturers.** For manufacturers CPL assumes full project management. Competent project teams execute logistic projects with binding force.
